# SHUBHAM SINGH

AI & ML Engineering Student | Machine Learning Enthusiast

+91-7052566713 | thakurshubhamsingh0007@gmail.com | LinkedIn

## SUMMARY

Computer Science Engineering (AI & ML) student with a strong foundation in Python, Java, Data Structures, Data Science, Machine Learning, and Deep Learning, with hands-on experience in AI/ML-based projects. Seeking an entry-level opportunity to apply software development, analytical, and problem-solving skills and contribute to building scalable and innovative technology solutions.

## EXPERIENCE

**Acmegrade — AI/ML Trainee** April 2025 – June 2025

*2-Month Training Internship*

- **Objective:** Built and evaluated machine learning models on real-world datasets.
- **Tools:** Python, Jupyter Notebook, Pandas, NumPy, Scikit-learn, Matplotlib.
- **Work:** Performed data preprocessing, feature engineering, model training, and performance evaluation.

## EDUCATION

**Bachelor of Technology in Computer Science & Engineering (AI & ML)** *Expected 2027*

Greater Noida Institute of Technology (GNIOT) — CGPA: 8.13

**XII – CBSE Board, Sun Flower Convent School** 2023

Percentage: 80%

**X – CBSE Board, Sun Flower Convent School** 2021

Percentage: 81%

## SKILLS

- **Programming Languages:** Java (OOPs, Collections, Exception Handling), Python, C++
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Data Science & Analytics, Machine Learning, Deep Learning
- **Tools & Technologies:** HTML, CSS, JavaScript, Tailwind CSS, Git, GitHub, SQL (Basic), REST APIs (Basic)
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Time Management

## PERSONAL PROJECTS

**Veritas – Deepfake Detection System**

- Developed an AI-based system to detect whether images and live webcam frames are real or fake using React, Vite, Python, PyTorch, MobileNetV2, and OpenCV.
- Integrated real-time webcam analysis using OpenCV with frame-level prediction, enabling live detection of potentially manipulated faces.

**Face Recognition Based Attendance System**

- Automated attendance using face recognition to prevent proxy attendance, built with Python, OpenCV, Face Recognition, NumPy, and SQLite. Suitable for schools, colleges, offices, and employee attendance management.
- Implemented real-time face detection and recognition with automated attendance logging.

## CERTIFICATIONS

- Data Scientist (Python) — NCET Plus (National Competence & Employability Test), GNIOT — Score: 88.50% (Grade: O – Outstanding), Sept 2026
- AI/ML Training & Internship Certificate — Acmegrade
- C & C++ Training Certificate — IIT Kanpur
